Who are We

Founded in 2021, **POLY SERVICES INGENIERIE** was established by a group of seasoned oilfield engineers with a shared vision : to deliver high-quality, reliable, and efficient oilfield services locally, built on decades of frontline experience.

Our company was born from the desire to offer technically sound solutions with a deep understanding of field and local realities, operational risks, and the evolving needs of the energy sector.

Our Core values:

- Integrity and Accountability
- Excellence in Execution

3

Our Activities

We deliver oilfield services covering well construction through to production, supporting operations throughout Central and West Africa. Leading companies such as TotalEnergies, Perenco, SNPC, PETROSI-IVC, Trident Energy, Olive-Energy, SLB, AXOM SA Wellbore Integrity Solutions, and Coraf rely on our team for prompt service, proven field expertise, and consistent performance. Every project is handled with thorough preparation, a strong commitment to safety, and a focus on achieving measurable results while protecting the environment

Our Mission

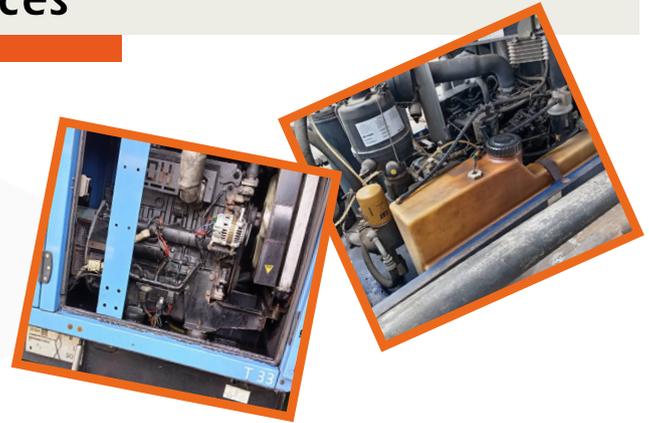

Our mission is to deliver safe, high-quality, and cost-efficient solutions that minimize downtime and boost production and profitability, all without harm to the environment. We are committed to creating lasting value for our clients by blending technical expertise with operational flexibility. Looking forward, our vision is to become Africa's leading regional partner for integrated oilfield services, known for reliability, cost-effective solutions, and environmental responsibility.

Oil services

Maintenance

We provide maintenance services for a wide range of engines and oilfield equipment. Our qualified technicians ensure your equipment remains in top operational condition, reducing downtime, extending service life, and improving safety and performance. From routine servicing to full overhauls, we support operations with reliable, cost-effective maintenance solutions tailored to your operational needs.

Provision of staff

With our staffing solution, you maintain the legal status of the lending company while PSI temporarily manages part of your workforce. This approach, known as "staff lending," allows your organization to access specific skills without entering into formal employment contracts with these workers, all while staying compliant with local laws and regulations.

Tubular running services and drill pipes

We provide reliable Tubular Running Services (TRS) and high-quality drill pipes to support efficient, safe, and cost-effective well construction. Our TRS solutions cover the handling, makeup, and running of casing and tubing, using advanced equipment and experienced crews to reduce rig time and ensure connection integrity. We also supply and service a wide range of Drill Pipes, HWDP, and Drill Collars, built to meet API standards and field-proven across oilfield operations.

Drilling tools

Hole-Openers, Motors, Turbines, Stabilizers, Circulating-Subs, Filter-Subs, Reamers/Under-reamers

Oil services

Wellbore Clean out

Whether preparing for completions, stimulation, or production, our WellBore Clean Out services ensure a clean, debris-free wellbore for optimal performance and equipment reliability. Our tools are designed to remove solids, scale, mud, cement, and metal debris using advanced mechanical, and circulation techniques to minimize downtime and maximum well integrity.

Solids control

Efficient solids control is essential for maintaining drilling fluid quality, reducing waste, and protecting equipment. Our Solids Control solutions are designed to remove drilled cuttings and unwanted solids from the mud system using high-performance shale shakers, desanders, desilters, and centrifuges. We help operators maintain optimal mud properties, reduce non-productive time (NPT), and lower overall fluid costs by ensuring safer, cleaner, and more efficient drilling operations on both onshore and offshore rigs.

Fishing and Remedial

We support our customers with any fishing operation related to mechanical failure, stuck pipe, junk in hole, or collapsed casing and restore wellbore continuity and operational integrity with minimal downtime. We provide reliable and swift intervention using industry-proven fishing tools and techniques. Our experienced team delivers efficient solutions for Fishing Recovery, Milling, Casing Repairs, Plug and Abandonment, Cased and Open Hole sidetrack... ensuring safe, cost-effective continuation of drilling, completion, or production operations.

Our products

Drilling Bits

We offer a comprehensive range of high-performance Drill Bits engineered for efficiency, durability, and optimal ROP across various formations and drilling environments. Our portfolio includes PDC bits, roller cone bits, and Casing While Drilling bits tailored for vertical, directional, and horizontal drilling applications. Backed by field-proven performance and expert engineering support, our drill bits deliver consistent results, reduced bit runs, and lower overall drilling costs.

Tubing and Casing accessory

We supply a complete range of tubing and casing accessories designed to support efficient well construction and long-term integrity. Our products include centralizers, stop collars, float equipment, cementing plugs, scratchers, torque-ring and more, engineered to ensure proper casing placement, effective zonal isolation, and smooth running in challenging well conditions.

Completion products

Whether you need a single completion component or a full integrated solution to connect the reservoir to the surface facility, our portfolio offers a wide range of high-quality completion products. These include gas lift valves, flow control devices, sand control equipment, bridge plugs, sliding sleeves, cement retainers, squeeze packers, isolation plugs, various types of packers, production tubing, Christmas trees, and wellheads, ... All designed to enhance well performance and reliability.

Baskets and Mini containers.....

We offer for hire offshore loading baskets and mini-containers which comply with DNV 2.7-1 / EN 12079 requirements and are suitable for transporting equipment in oil and gas environments.

Our partners

They trust PSI, and you ?

Why you must choose PSI ?

Benefiting from solid experience and constant motivation, PSI has a young, qualified, dynamic and competent management team.
